

MICHIGAN ACADEMY OF FAMILY PHYSICIANS Okemos, MI

For seventy years, the Michigan Academy of Family Physicians (MAFP) has been the state's largest specialty physician association. With more than 4,200 members, MAFP is dedicated to assisting family physicians and their practices as they work to ensure high-quality, cost-effective health care for patients of all ages.

PROJECT OVERVIEW

OBJECTIVE: Bring the office space "into the 21st century" with a cost effective solution maximizing an aggressive budget and timeline. Client was looking for an updated color palette reflecting their brand, a floor plan that considered their culture of work, the blending of furniture and technology and automated window treatments controlling light and heat concerns.

SOLUTION: Completed on time and on budget, DBI created a smart, functional conference room - the new 22' table accommodates a full board (21 members) and the room is equipped with both visual and audio capabilities for off-site conferencing and solar window treatments to enhance space functionality. The new reception station is the focal point and a welcoming handshake of the guest waiting area and ample storage was provided for private offices for personal items and work related needs.

Design, Furnishings and Installation: DBI

Design Rendering: Reception Station

Design Rendering: Conference Table

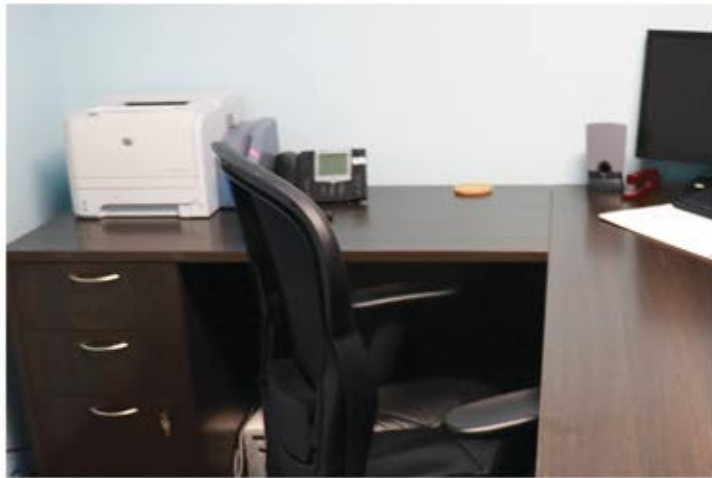

“Working with DBI was a great experience and we had many furniture options and styles to choose from. Our DBI representative, Garrett Barnes, was easy to work with and he kept a sharp eye on timeframes for us.

The office desks, reception station, conference table, and window treatments look great. The finish and fabric options fit well with our overall office motif and color scheme. We are happy with the work provided by DBI and will definitely keep them in mind for future projects.”
